

## **Institutional Effectiveness: Evidence of Improvement Based on Assessment Activities.**

### **Examples for Institutional Effectiveness in Athletics (2):**

- Each semester, there is at least one social event hosted by Athletics, inviting all faculty and their families to interact with coaches and other Athletics Department staff prior to a major athletic contest. The hope is that increased interaction between faculty and athletics staff will lead to greater communication. Faculty indicated an interest in this type of activity in survey responses.
- Access to the Baker Sports Complex has been expanded for athletes by allowing them to use their identification cards for electronic access to appropriate areas of the building which had previously been restricted.
